

Subset of Manual Testing

What is it being tested	Expected Outcome	Actual Outcome	Notes
If blank app with blank grey window is generated, with the title of the window at the window	Blank grey window pops up	 Same as Expected outcome	
Add a text label "Welcome to the" and place it on the blank window	Text appears on the window when generated	 Same as Expected Outcome	
Underneath "Welcome to the" place bigger and bolder text "Cloud & AI Solution Engineering Knowledge Tester"	Text appears on the window when generated	 Same as Expected Outcome	I will reduce the font size slightly and/or increase the window size
Add instructions, inside a white or lighter grey box, for the quiz. The text should wrap to a new line if it's longer than the width of the box	Instructions in a lighter coloured box / frame that is wrapped around to new line if longer than box width.	 Technically same as expected outcome, but inappropriate design	I will change the width and length of the box, and add padding to this box
Add "Choose a Solution Area!" 👉 " As lighter or white text underneath instructions	"Choose a Solution Area!" 👉 " appears underneath instructions as bigger and lighter text with background same grey color as window	 Error occurred – incorrect method of setting font color	Corrected by using fg parameter in Label instead. 

Add AI/Apps button with a coloured background and white text. Command method for button should do nothing for now.	AI Apps button underneath "Choose Solution Area" text, with a pink background and white text. Upon clicking, nothing should be done	 As expected	Will widen button and reduce colour saturation.
Add Data and Infrastructure buttons with a coloured background and white text. Command method for button should do nothing for now.	Buttons appear underneath AI/Apps, with a pink background and white text. Upon clicking, nothing should be done or something	 As expected	
Add in a message box upon pressing any of the three buttons that warns about permanent choice	Yes No Cancel message box appears reiterating choice and making sure that the user knows that this is permanent	 As Expected	
Presence check for confirm choice method	Checks if only True result from messagebox gets printed – to be used for downstream services.	As Expected	
Create a new window if choice is confirmed	A blank window pops up when choice is confirmed	As expected	
Colour the new window with appropriate theme colour for solution area	A coloured window appears depending on what the solution area is, with bold, coloured text displaying the name	As expected	
Add text for solution area name	"[Solution Area Name] Knowledge	As expected	Used tk.Frame for positioning

and "Knowledge Quiz" next to it.	Quiz" will appear at the top middle of the new window		
Add question text, radio buttons and next button	Question text appears at the top, with four options as radio buttons in the middle, with a button to move onto the next question at the bottom	They appear but are misaligned in position and colour
